## DETAILED ACTION

### *Response to Arguments*

1. Applicant's amendment filed 1/4/2007 with respect to 1-12 is sufficient to obviate the previous office action rejection. The rejection of claims over Yang et al and Kito are hereby withdrawn.

Please note that the withdrawal of claims 18-20 was inadvertently withdrawn from consideration. It is clear that they claims should have been included in the rejection of the previous office action because the claims did read on the compounds disclosed in Yang et al and Kito.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

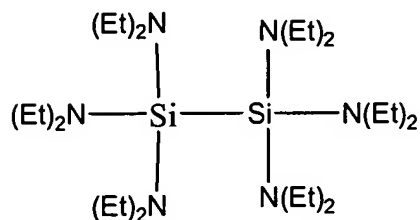

3. Claims 1-12,18,20,21 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Wan et al ( Synthesis of (dialkylamino)disilanes: Inorganic Chemistry (1993), 32(3), 341-4).

Wan et al discloses the following compound in benzene<sup>1</sup>.

---

<sup>1</sup> See page 342, the compound named Hexakis(diethylamino)disilane.

Art Unit: 1621

The compound is fully embraced by the instant claims. This compound meets all the limitations of the claims. Some limitations are drawn to inherent properties. For example claims 5, 6 11, and 12 are drawn to properties of the compounds. These limitations are inherent properties of the compound taught in Wan et al.

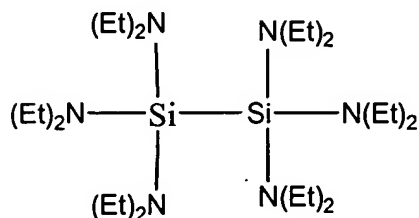

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 18-19 and 21-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wan et al.

Wan et al substantially disclosed the claimed invention. See 102(b) rejection stated herein. The instant claims differ by reciting the solvent HNiPr<sub>2</sub>. Wan et al used benzene when making the compound

Art Unit: 1621

It would have been obvious to one having ordinary skill in the art at that time that applicant's invention was made to have used other solvents in the recovery of Hexakis(diethylamino)disilane with a reasonable expectation of success. One skilled in the art would have been motivated to use other solvents depending on such factors as availability and cost.

### ***Conclusion***

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
